

# Feature-rich, entry-level next-generation firewall in a slim form factor

## FEATURES AT-A-GLANCE

- Cost-effective next-generation firewall for remote-/branch offices and as CPE in MSSP scenarios
- Next-generation firewall and UTM services, including Clavister True Application Control and User Identity Awareness
- Built-in support for both IPsec and SSL VPN offers easy to use remote connectivity
- Centralized Management and reporting comes included in the Clavister Security Subscriptions and ensures efficient administration also in large network with many devices
- High-end network infrastructure features, such as QoS/Traffic Management and WAN Load Balancing, are all included

The Clavister E20 is the perfect entry-level next-generation security appliances, built to deliver comprehensive and powerful enterprise-grade firewall services. Perfectly suited as a customer premise equipment (CPE) in MSSP scenarios or offering enterprise-class security for small branch offices and remote locations. The Clavister E20 is ideal in solutions where multiple firewalls are deployed, often over geographically dispersed areas, and where there is a strong need for a centrally managed, scalable network security solution.

## Next-Generation Firewall Services

## **True Application Control**

Do not be fooled by the small package, this is a real next-generation firewall, providing powerful throughput even when using the advanced security features. It proves that you can get next-generation firewall functionality without having to buy the biggest box on the market. Clavister E20 fully supports True Application Control – one of our next-generation firewall security services.

Enabling True Application Control will help you to manage applications used in your network more safely. With added security you lower your overall risk exposure and as a result, costly security incidents and downtime can be avoided. It also gives you valuable insight in which applications are used by which user, and can therefore prioritize business critical application and increase your overall business productivity.

Clavister SSL Inspection for Application Control provides a high performance and non-intrusive way to identify and control even SSL encrypted applications.

True Application Control is included in the Clavister Security Subscription (CSS) service.

#### **Connectivity Choices**

The Clavister E20 is equipped with a flexible switch block with four 1GbE (RJ45) interfaces, plus two 1GbE (RJ45) interfaces. This means that you have a wide range of connectivity options when setting up your Clavister E20.

**Desktop or Rack Mounted – Your Choice** Since it is designed to be placed anywhere, even in your office environment, we made it look stunning so it can fit right in with your other

equipment. You also have the option to use the included rack mount kit should you decide you rather mount the Clavister E20 in a rack. Your product, your choice.

Multiple WAN Links

The Clavister E20 supports multiple WAN Links. This could be extremely important in the case of using the Clavister E20 in remote office locations, where premium high-speed Internet links can be hard to find and/or expensive to us.

Multiple WAN Links enables you to connect multiple Internet Service Providers (ISPs) to ensure optimal Internet access, even in the case when one ISP service fails. By utilizing multiple Internet links at the same time, you can route outgoing traffic to the link with the most free capacity and/or with the lowest latency.

## **Content Security Services**

Having a regular firewall is not enough to prevent attacks from happening on your network. As attacks become more severe and the threat landscape becomes more dynamic, additional measures need to be in place to protect your network.

Clavister offers best-of-breed content security services that adds an additional layer of defense, including:

- Intrusion Detection and Prevention
- Network centric Anti-Virus / Malware
- Web Content Filtering / Categorization
- Anti-Spam

These content security services protect your network from advanced threats your firewall alone cannot stop. The Content Security Services are included in the Clavister Security Subscription (CSS) service.

## User Identity Awareness

User Identity Awareness (UIA) provides granular visibility of user identity, and enables you to control network access at the user level. The User Identity Awareness together with our True Application Control functionality will provide you with an extremely powerful and versatile tool for granular visibility and control of "who-does-what-and-when" in your networks. You will have the ability to pinpoint user access to applications across both wired and wireless networks regardless of connecting device.

# Subscriptions and Services

## **Clavister Subscriptions**

We believe our customers should have choices. We also believe you should have it all. Therefore we offer you a choice between our comprehensive Clavister Product Subscription (CPS), or our all-inclusive, full service option, Clavister Security Subscription (CSS).

## **Clavister Product Subscription**

The Clavister Product Subscription contains a high number of product services, such as software updates, centralized management and extensive technical support.

CPS includes a hardware replacement service to offer you the best possible protection in case a hardware failure should occur. Finally to ensure you get the best out of your Clavister security gateway, we provide you with around-the-clock support from our award-winning technical support team – an attentive, dedicated and highly skilled team of engineers that help you out in case of need. The Clavister Product Subscription keeps your Clavister updated, online and ready for business twenty-four-seven.

## **Clavister Security Subscription**

Clavister Security Subscription is a complete, all inclusive suite of product services. It contains all the services you get with Clavister Product Subscription, but extends the service offering by including a full set of nextgeneration firewall services, such as Clavister True Application Control, Web Content Filtering, Anti-Virus and Intrusion Detection and Prevention (IDP). CSS offers best-in-class content services, which protect you from the more advanced types of malware and exploits. It grants you access to the latest software and signature updates keeping your infrastructure up to date and increasingly more stable and secure.

All Clavister Subscriptions are available in 12, 24, 36, 48 and 60 months service terms, offering you maximum security and flexibility.

For more information about Clavister Subscriptions, see the separate Clavister Subscriptions brochure.

## True Flexibility - Get more performance when you need it

Clavister E20 is available in two models, each addressing specific customer requirements. Should your performance needs increase, Clavister offers you the flexibility to upgrade to the more powerful Clavister E20 Pro without having to invest in new hardware. Just simply order the upgrade to your preferred Clavister E20 model and install the new license file. It is as simple as that.

This makes Clavister E20 a low risk choice in dynamic business environments where requirements can change overnight. Clavister provides you the performance when you need it, avoiding high up front investment costs to your security infrastructure or having to worry about costly upgrades.

## Uptime Technologies

Clavister E20 comes with powerful features to ensure that your network infrastructure is online and ready for work. Features like Fast Route Failover, WAN Load Balancing, Secure WAN Load Balancing with robust VPN tunnels simultaneously used across multiple WAN links, guarantee uninterrupted communication with your headquarter.

## Powerful Next-Generation Firewall

The Clavister E20 is a next-generation firewall, but it also has all the traditional security features, such as stateful firewall with deep-packet inspection, and it is powered by our own in-house developed network security operating system, the Clavister cOS Core. As well as providing all traditional firewall functions, such as port blocking and proxy server, the Clavister E20 incorporate next-generation firewall features to detect and block sophisticated application-level attacks. This means higher level of security, higher traffic throughput and minimal use of system resources.

## Performance

Clavister E20 provides next-generation security services across all points of your network without sacrificing performance throughput. Purpose-built hardware running on our highly efficient network security operating system ensures that the firewall performance throughput is one of the highest in the industry, making sure that your Clavister firewall will not be a bottleneck in your network infrastructure.

## Simplicity

We strive to make things easy to understand and easy to use. This includes everything from hardware design to security management. We build highly customizable enterprise-grade firewalls, and despite the inherent complexity, we make an effort of making it easy to use. For example, our highly acclaimed centralized security management system, Clavister InControl uses color-coded attribute groups to provide a clear overview over dependencies that the firewall rules have to each other, making human errors less likely to occur. By combining policies and services into one, firewall policy management can be simplified and more easy to use. This results in fewer policy rules, making it easier to manage and less likely to cause a security breach.

## All-Inclusive Security Management

For any network, security management is one of the more important aspects. It has to be intuitive, efficient and easy to use for large enterprises, with multiple firewalls at multiple sites, and even in geographical disperse areas, keeping your security management consistent and cohesive, and up to date is a non-trivial task. All these security management systems are included with our Clavister cOS Core products – free of charge.

## Clavister InControl - Centralized Security Management

Clavister InControl offers a comprehensive centralized management solution that will assist and help administrators perform their daily tasks faster, easier and in a more streamlined way. Its intuitive user interface and support for task-driven workflow management guides administrators through complex and repetitive tasks, thereby alleviating the burden of managing large installations. With support for triple-AAA (Authentication, Authorization and Audit) the integrity and configurations managed by the Clavister InControl system is kept under strict control. This level of control makes it easy to use delegated management, allowing specific teams and personnel to access only designated parts of the system. Clavister InControl can be extended to collaborate with a vast number of other management system with the use of the Clavister InControl Software Development Kit (SDK). The Clavister InControl SDK enables organizations to integrate and extend existing system management tools with Clavister InControl management. For example, optimized provisioning systems or integrated help desk functionality.

## **Clavister InControl Reporting**

Clavister InControl comes with a comprehensive reporting system that offers enterprise-level reporting with tight integration with all Clavister cOS Core-based products.

Clavister InControl reporting enables you to visualize your Clavister security solution, including pinpointing problem areas, thwarted attacks and other security issues, and then turn them into business-level reports. Reports can be generated in PDF format or HTML format.

## Other Management Options

In addition to our centralized management solution, we also provide the Clavister Web Management system, an easy-touse Web-based security management solution that works for smaller installations with just a few firewalls. Each product also supports our comprehensive command-line interface (CLI), enabling you to script common tasks.

# Where to Buy Clavister

For more information about where to buy Clavister products, visit <u>www.clavister.com/partners</u>. Additional resources and customer testimonials can be found at <u>www.clavister.com/</u><u>resources</u>.

## **Next-Generation Firewall Security**

By integrating world-class Next-Generation Firewall functionality, such as our Clavister True Application Control, Intrusion Detection and Prevention (IDP), Anti-Virus, Anti-Spam and Web Content Filtering with a stateful firewall with deep packet inspection, IPsec and SSL VPN connectivity, we are able to protect your organization against everything from network layer attacks to application layer threats, and even viruses and worms. While you have full control of who does what, when and with what.

## **Clavister cOS Core**

Clavister cOS Core is our in-house developed, high-performance security network operating system. Every line of code is carefully crafted to ensure that it delivers maximum performance at all times. We take pride in delivering a product that we have full control over, rather than a mashup of open-source components.

## Flexibility and Adaptability

Not all networks are created equally. Vast differences in network topology and configuration require a network security gateway to be able to accommodate all these differences. Our security gateways gives you the freedom to set routing policies with extreme granularity. A large number of parameters can be used to construct policies and rules to meet even the most demanding network installation.

## Big on Performance - Low on Maintenance

All Clavister security gateways share a common trait: they all support Clavister Service Provisioning Network (CSPN). This secure, high-speed network ensures that all Clavister Security Subscription services are kept updated and current from newly emerging threats. This gives system administrators the freedom to concentrate on running their network without having to worry about having the latest security patches installed.

## License Scalability

One important aspect of our products is scalability. Our licensing model offers you the ability to start with your performance needs today and upgrade your product incrementally as your organization grows. You also have the choice of two subscriptions models: the Clavister Security Subscription, our all-inclusive subscription, or the regular Clavister Product Subscription.

## Low Total Cost of Ownership

Our goal is to provide a complete security solution that is more cost efficient than our competitors. Clavister security gateways, with their unique set of integrated security features, world-class service and support, and their powerful administration system, enables you to spend less time managing your security environment and keep your network defenses up to date, and thereby lower your network security infrastructure TCO significantly.

| Performance and Capacity                                                             | Clavister E20                                      | Clavister E20 Pro |

#### About Clavister

Clavister (NASDAQ: CLAV) is a leading security provider for fixed, mobile and virtual network environments. Its award-winning solutions give enterprises, cloud service providers and telecoms operators the highest levels of protection against threats, with unmatched reliability. Clavister's performance in the security sector was recognized with the Product Quality Leadership Award from Frost & Sullivan. The company was founded in Sweden in 1997, with its solutions available globally through its network of channel partners. To learn more, visit <u>www.clavister.com</u>.
